

# First quarter sales up 9%

unadjusted for changes in scope

## Sales; successful integration of acquired companies

Revenue from "Licenses and Integration services" advanced by nearly 11% (down 4.4% at constant scope) in the first quarter of 2009. The pace of growth in March was slightly ahead of that of the first two months of the year. Revenue from recurrent contracts rose by nearly 10%. This increase reflected the impact of acquisitions carried out in 2008 and confirmed the strong growth in the portfolio of recurrent contracts. As of March 31, 2009, the annual value of these contracts was €121 million.

Consolidated sales in the first quarter of 2009 totaled €62.0 million\*, vs. €56.8 million in the year-earlier period, representing growth of 9.1% (decline of 3.4% at constant scope).

## Conservative business approach, in line with economic conditions

The product mix improved, as a result of the increase in revenue from "Licenses and Integration services" and in recurrent revenue. This led to a further increase in the gross margin, which was 87% of sales (vs. 84.8% in Q1 2008).

The estimated average monthly breakeven point for the first quarter of 2009 was in line with our objectives and should lead to an average monthly breakeven in the region of €19.1 million over the full year. In particular, it reflected the changes in consolidation scope that took place in April and September 2008 (including VCSTIMELESS in the Retail sector abroad) and the increase in amortization expense on development costs.

In light of these factors, initial estimates point to a level of earnings in line with those of the first quarter of 2008.

Separately, Cegid continued to implement its strategy to focus on its principal areas of expertise. In this regard, discussions are currently underway that could lead to the sale of the vertical markets business for the construction industry (sales of approx. €1 million, 10 employees).
