Performance Management

**Modernize your  
performance  
management  
process.**

# Drive better business results with advanced performance management solutions.

The Cegid Performance Module enables organizations to design, implement and track all the processes for managing performance, development and career orientation—without the difficulty and cost of implementing traditional programs. It's a user-friendly interface that helps channel every employee's efforts toward the attainment of company objectives. It also allows organizations to measure their productivity gains through the alignment of common performance and business goals. Native integration with the Learning and Development platform makes it easy to assign learning activities and fill competency gaps in one seamlessly connected system. Likewise, the information can be used to support incentive programs through compensation or other rewards.

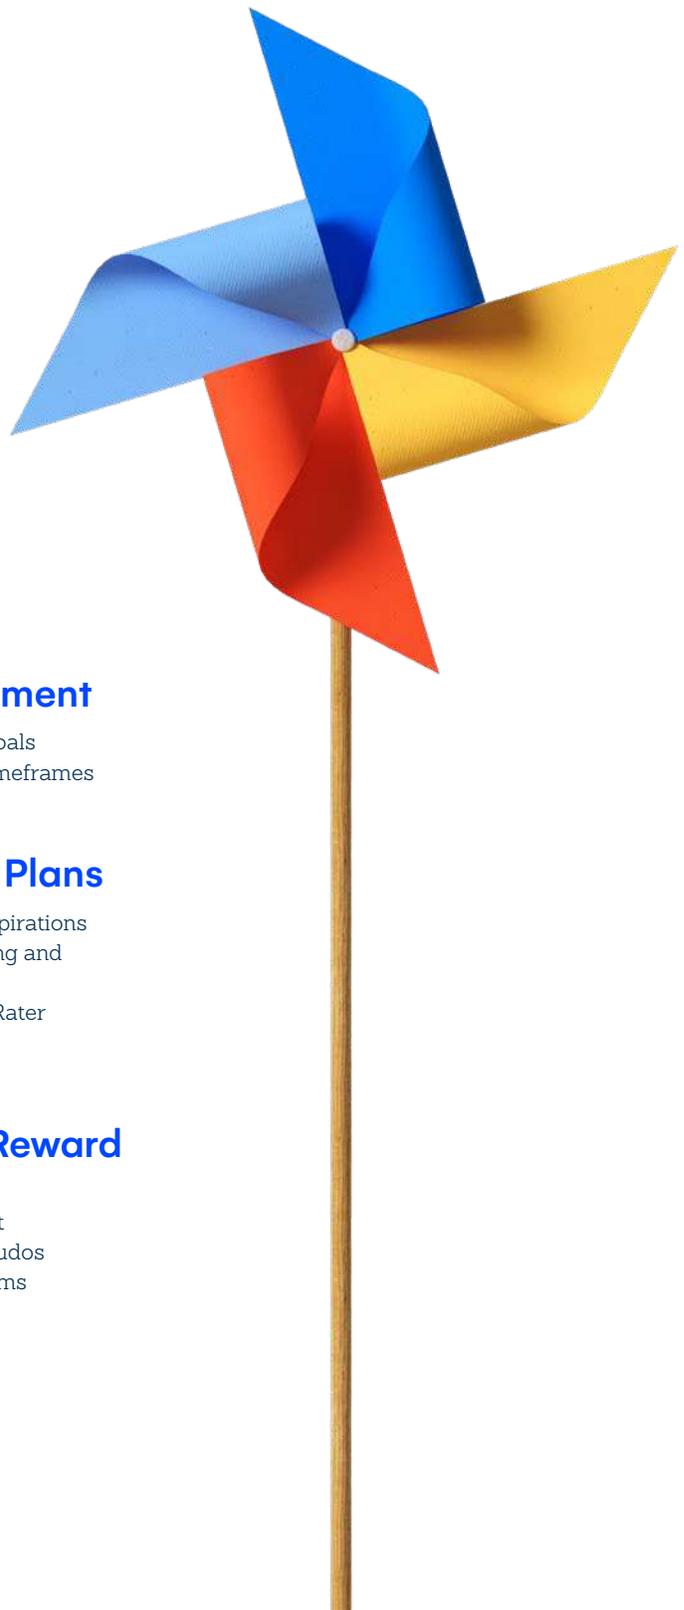

---

## Product Highlights

- › Give performance management a proactive dimension that results in concrete actions
- › Promote the achievement of organizational objectives by aligning individual goals with company priorities
- › Gain a better understanding of current core competencies and anticipate future needs
- › Identify skill gaps for learning and prioritize competency development activities
